The Bottom-Up Economic Transformation Agenda

My Manifesto for a Second Term

KAZI IENDELEE - Let the Work Continue

01 Agricultural Transformation & Food Security

Rebuilding the backbone of the rural economy - inputs, credit, and markets designed around the smallholder farmer, not around cartels.

- Subsidized, e-verified fertilizer and certified seed for smallholders
- Warehouse receipt financing so farmers can bank their harvest
- Revival of collapsed cooperatives, factories, and produce boards

02 MSME Economy & Financing

The 85% of Kenya's workforce in the informal sector are the real economy - this pillar puts collateral-free capital directly in their hands.

- The Hustler Fund: collateral-free micro-loans via mobile phone
- A dedicated MSME credit guarantee scheme
- Formalization pathways that don't punish informal traders

03 Housing & Settlement

Dignity over survival - a nationwide construction drive that builds homes and creates jobs on-site, county by county.

- Affordable Housing Programme units across all 47 counties
- Public land converted into planned, serviced settlements
- Construction-sector jobs prioritized for local youth

04 Healthcare Access

Universal coverage that follows the patient, not the payslip - replacing a fragmented NHIF with needs-based national insurance.

- The Social Health Authority (SHA): universal registration and coverage
- A dedicated fund for specialized and catastrophic-cost surgery
- Primary care expansion through community health promoters

05 Digital Superhighway & Creative Economy

Connectivity and content as economic infrastructure - putting Kenya's youth and creators onto the global digital economy.

- Nationwide fibre rollout and affordable last-mile connectivity
- Digital jobs and outsourcing hubs for young graduates
- Legal and financial infrastructure for the creative industries
